

## Enjoy the convenience and safety of motorized overhead storage racks

**The Ascension motorized overhead rack from Onrax creates a safe and easily accessible elevated storage space that reduces clutter and transforms your garage into a model of efficiency.**

Without the need for ladders or stools, storables can be loaded and unloaded at ground level—comfortably, quickly and easily. And because safety is always our top priority, we use 1500 lb. break strength seat belt straps, high quality side netting (standard with each unit) and enclosed bearing pulley wheels for a smooth and stable lift regardless of the weight and how it's distributed. Plus, our wall mounted control box features a key-lock switch to prevent unwanted use.

### **THE ASCENSION ADVANTAGE**

- 4-point lift system for platform stability
- Up to 400lbs
